

KV IMAGING SOLUTIONS

Integrated kV Imaging Solutions for Robotic Surgery Systems

Spellman has 4 decades of kV imaging experience in Computed Tomography and Cone Beam Computed Tomography. We are the world's largest producer of X-Ray generators and Monoblock® X-Ray sources.

Bring us your kV imaging requirements and we can tailor a system that delivers optimal performance for your application.

- **kV imaging can be used to improve the accuracy of pre-treatment and in-treatment plans**
- **The imaging system can be integrated into existing hardware and implemented in a minimally intrusive way vs portable CT or other general purpose imaging systems**
- **Spellman can optimize the geometry of the X-Ray field and detector, allowing for superior imaging quality**
